Jamael Tanveer

Software Engineer and Team Lead

Reutlingen, Germany | +49 1520 6718516 | imjtnayon@gmail.com | linkedin.com/in/jtanveer | github.com/jtanveer

SUMMARY

Software Engineer and Team Lead with over 15 years of experience in full-stack software development and leading engineering teams. Hands-on experience building robot GUIs with Vue.js over REST, WebSockets, and ROS, and web applications and developer platforms with React, consuming Protobuf schema contracts over gRPC services, including agentic, prompt-driven workflows for creating platform assets. Experienced in managing frontend development teams, taking on cross-functional responsibilities as Technical Product Owner, and delivering reliable solutions across web, backend, and mobile technologies.

SKILLS

Languages: TypeScript, Python

Frontend and Mobile: React, Vue.js, Flutter

Backend and APIs: Node.js, NestJS, FastAPI, REST, gRPC, Protobuf, WebSockets, ROS

Databases, DevOps and Cloud: MongoDB, PostgreSQL, Docker, CI/CD, Cloud

Engineering: System Design, Architecture, Authentication and Authorization (AuthN/AuthZ), AI-Driven Workflows

EXPERIENCE

Group Lead - UX and Frontend (UXFE)

Neura Robotics GmbH, Riederich, Germany | Apr 2026 - Present

- Manage the UX and Frontend (UXFE) development team following the company restructure, covering hiring, onboarding, one-on-ones, and performance reviews.
- Coordinate collaboration between product teams to keep frontend standards, reviews, and releases aligned.

Technical Product Owner - Creator Hub

Neura Robotics GmbH, Riederich, Germany | Apr 2025 - Present

- Own the technical backlog for Neuraverse Creator Hub, where partners create, version, and publish nodes, devices, and AI models.
- Deliver React micro-frontends consuming Protobuf schema contracts over gRPC services.
- Integrate Aura AI for agentic, prompt-driven node and device creation.

Group Lead - GUI

Neura Robotics GmbH, Riederich, Germany | Jun 2023 - Apr 2026

- Led the robot arms GUI team; built and maintained operator interfaces in Vue.js, connecting robots to controls, applications, and AI via REST, WebSockets, and ROS.
- Unified per-robot GUIs into a single codebase.

Full Stack Engineer

Neura Robotics GmbH, Riederich, Germany | Aug 2022 - Jun 2023

- Built cobot GUI features in Vue.js and Node.js, and a ROS client integrating the GUI with AI modules.

Principal Software Developer

Red.Digital Limited, Dhaka, Bangladesh | May 2021 - Jul 2022

Lead Software Developer

Red.Digital Limited, Dhaka, Bangladesh | Jan 2021 - May 2021

- Project lead for an e-commerce aggregator and user access management platform.
- Developed a prototype OTT communication app.

Software Engineer (Code Athlete)

Robi Axiata Limited, Dhaka, Bangladesh | May 2018 - Jan 2021

- Built a communication platform for farmers, converted a workflow platform to a PWA, and developed a microfinance Android app.

Senior Software Engineer (Head of Technology)

Green and Red Technologies Limited, Dhaka, Bangladesh | Jan 2015 - May 2018

Software Engineer

Green and Red Technologies Limited, Dhaka, Bangladesh | Mar 2013 - Dec 2014

- Led the engineering team to build products such as a work suite, an e-wallet, and a native Android ad SDK for mobile applications.

Senior Android Developer

Mangoes Mobile Limited, Dhaka, Bangladesh | Apr 2011 - Mar 2013

- Built a communication and case analysis tool for clinicians that helped collect health data from rural areas in Botswana.

EDUCATION

Executive Master's in Computer Science, Jahangirnagar University | Jan 2015 - Dec 2015 | CGPA 3.78/4

BSc in Computer Science and ECE, BRAC University | Jan 2007 - Apr 2011 | CGPA 3.33/4
